Education

University of Management and Technology (UMT), Bachelor of Science in Computer Science	October 2023 – July 2027
Beaconhouse College Program (BCP), Cambridge International A-Levels	2022 – 2023
Beaconhouse School System (JTC), Cambridge International O-Levels	2021 – 2022

Experience

3D Game Developer Intern, Airidev	Sep - Oct 2025
• Worked on hyper-casual game prototype, a Pop-It style game, using Unity and C#. • Implemented player controls, object interactions, and core gameplay loops to create smooth and engaging experiences. • Integrated animations, particle effects, and UI systems to enhance visual feedback and user engagement. • Collaborated with mentors to iterate on gameplay ideas and polish game mechanics within tight deadlines.	
Word Car Puzzle Game (Client Project),	2025
• Developed a car based word matching game where players select the correct lettered car and place it into designated slots. • Refactored and optimized an existing Unity project with a disorganized codebase and multiple gameplay bugs. • Resolved core logic issues involving letter selection, drag mechanics, and slot-based placement system.	

Projects

Knife Hit Replica – Unity (C#)	Play Here
• Developed a knife-throwing arcade game with rotating target mechanics. • Implemented input handling, collision detection, and score tracking with enhanced gameplay feedback.	
Horror Game -Prototype (Unity C#)	Play Here
• Built a 3D Horror game inspired from granny. • Implemented AI granny behavior using NavMesh and raycasting and sound detection. • Added interactive systems including pickups and key-based level progression.	
Ball Smash – Unity (C#)	Play Here
• Developed a physics-based survival game with force-driven player movement. • Designed modular enemy spawning system for scalable gameplay.	

Certifications

Unity Game Development, Game Train – Frag Games Collaboration, Gulberg, Lahore	Mar 2025 – May 2025
• Completed an industry-aligned Unity and C# course in collaboration with Frag Games. • Gained hands-on experience in player controls, physics, AI, UI systems, and gameplay mechanics. • Developed guided projects incorporating animations, particle effects, and core game logic.	

Skills

- **Technical:** Unity, Git/GitHub, Game Design, Canva, Basic Editing/Graphic Design
- **Programming:** C#, C++, HTML, CSS, JavaScript, Assembly
- **Soft:** Teamwork, Iterative Development, Time Management, Communication, Attention to Detail, Adaptability
