Summary

Unity game developer with experience building gameplay systems, tools, and polished prototypes in **Unity and C#**. Worked on puzzle, hyper-casual, simulation, and horror-style projects with hands-on experience in **gameplay programming, debugging, AI behaviors, UI systems, level workflows, and optimization**.

Experience

Game Developer Intern, Mizo Studio Apr 2026 – Jun 2026

- Developed **Snake Escape**, a hyper-casual puzzle game; built a custom level editor supporting 70+ JSON-based levels for scalable content creation.
- Debugged gameplay, physics, collider, and UI issues in a simulation project while improving code quality and maintainability.
- Built **RCC Police Chase**, a vehicle chase game using Realistic Car Controller and Enemy AI; created cinematic cutscenes with Cinemachine and Timeline.

Game Developer Intern, Airidev Sep – Oct 2025

- Built a hyper-casual Pop-It style prototype in Unity/C#, implementing player controls, object interactions, and core gameplay loops.
- Integrated animations, particle effects, and UI systems to improve visual feedback and player engagement under tight deadlines.

Word Car Puzzle Game, Client Project 2025

- Refactored and optimized a disorganized Unity codebase, resolving core bugs in letter selection, drag mechanics, and slot-based placement.

Projects

Knife Hit Replica – Unity (C#) Play Here

- Built a knife-throwing arcade game with rotating target mechanics, custom input handling, collision detection, and score tracking.

Horror Game Prototype – Unity (C#) GitHub

- Built a 3D horror game inspired by Granny; implemented AI behavior using NavMesh, raycasting, and sound detection, plus pickup and key-based progression systems.

Education

University of Management and Technology (UMT) – BS Computer Science Oct 2023 – Jul 2027

Beaconhouse College Program – Cambridge International A-Levels 2022 – 2023

Beaconhouse School System – Cambridge International O-Levels 2020 – 2022

Certifications

Unity Game Development, Game Train – Frag Games Collaboration Mar 2025 – May 2025

- Industry-aligned Unity/C# course covering player controls, physics, AI, UI systems, and gameplay mechanics through guided projects.

Skills

- **Technical:** Unity, Gameplay Programming, Debugging, Git/GitHub, Cinemachine, NavMesh AI
- **Programming:** C#, C++, JavaScript, HTML/CSS
- **Soft Skills:** Teamwork, Iterative Development, Time Management, Communication, Attention to Detail
